

# W100 MONITOR ARM

# Ergonomic Monitor Arm

This monitor arm is designed from ergonomics aspect. It solved the problem of fixed height or position of standard monitor. Height and angle of monitor can be adjusted freely as per stature of user. It can effectively relieve shoulder pain and eye ache caused by inappropriate height and distance of monitor, which greatly improves user's degree of comfort during working.

1. Concise appearance can fit any monitor and user's working environment better. Cable management inside the product and clamp can save desk space, making working environment tidier .

2. Upper arm is designed with mechanic spring inside, making the whole arm moves very smoothly. Under constant force, it can reach any position by very light pushing or pulling in order to achieve the angle and position requested by user. 25000+ cycle test guarantees its long lifetime.

3. Tilt head is designed with torsional spring, longer lifetime. This makes sure that monitor won't drop down when being adjusted and used.

4. Newly designed clamp can be installed on bevel edge desk.
