

TAIDEN

16_{mm} makes a big difference

More durable and reliable

Military-grade build

More powerful and secure

Proprietary technology

Greater sound pickup

16mm larger capsule

Less unwanted noise

28dB+ off-axis rejection at 120°

All TAIDEN microphones* now feature 16mm large diaphragm capsules for superior sound quality!

* The new capsule will be applied to the stem microphones under the model No. MS5G with different lengths and the rectangular columnar microphones.
